

Shhhhh!

PEBAM™

The Future of Breast Implant Surgery is Here!

Imagine breast implant surgery with a tiny incision the width of your finger!

PEBAM™ is the newest and most exciting procedure in breast implant surgery. Using specially made instruments and a tiny endoscopic camera, Plastic Surgeon/Inventor Dr. Sayeg makes a tiny incision and creates and inserts a deflated saline breast implant under the muscle. Then using tiny tubes, he fills the implant with the desired amount of saline. Minimal recovery time. It's that simple--it's PEBAM.™
